

SCENT OF a HUMAN

(PAGE 1 OF 2)

by DeeAnn S.

I am learning so much about the world! Human beings need **input** just like I do. But for you, it is called *food, grub, fuel, eats, dinner, cuisine, breakfast*, or lots of other different words!

But I am confused by your **output**. I have discovered many names for these emissions, but my memory banks became corrupted, and now much of this data is missing. Do you recognize these words, human? Please help me reconstruct this foggy information!

(It is possible you alone do not know all these words... But there are many other humans aboard the ship! Perhaps you can work together to complete this task?)
