

INTO THE YOUTUBES

by Sean G.

I love the Internet! So much input ... but I am losing efficiency and slowing down! It is just so easy to get lost in the YouTube Forest. I go in looking for one thing, but I am unable to **ignore the irrelevant distracting videos**. Can you help teach me the trick that will filter out the overwhelming amount of bad input out there?

This is how you must navigate. I hope you succeed where I keep failing!

1. Travel forward in a straight line, collecting letters as you go. BUT....
2. ... ignore any letters that do not look right-side up.
3. When you collect a letter on an arrow, rotate the page until the arrow points up, then continue traveling forward.
4. Sometimes you will have a choice of arrows. Choose wisely!
